Story, WY

D \* \* \* G           A7       D  
You and I drew a good lot in life  
      D \* \* \*           G                   A4 A  
And who knew, we'd ever be husband and wife  
      G                   A7       D                   G  
But together we are stronger than the sum of our parts  
G                   A7       G   A7       D  
Lifting up our voices, and joining hearts

      G                   A7       D                   G  
Together we are music, you're my counterpart  
G                   A7                   D  
Singing together down the highway  
G                   A7                   D                   G  
Today we stand together, whatever comes our way  
      G                   A7       ?       D  
And we're still hand in hand and heart to heart

You and I do, love our life on the road  
Choosin' music, two for the show  
Or maybe music chooses us, but we're playin' along  
Singing together, our life is a song

Chorus  
Break

Bm                   Bm/A                   G  
It's about the love we have to offer  
      C                   G                   A   A4 A  
There's so much more inside we have to give  
      Bm                   Bm/A                   G  
And it's about the road we have chosen  
      Em                   G                   A7       D  
There's not another life I'd rather live

You and I drew a good lot in life

Chorus

      G                   A7                   D                   G  
Today we stand together, whatever comes our way  
      G                   A7                   Bm Bm/A  
And we're still hand in hand and heart to heart  
      G                   A7                   D  
. . . Hand in hand and heart to heart
